

MEMORANDUM OF UNDERSTANDING
BETWEEN THE
UNITED STATES POSTAL SERVICE
AND THE
NATIONAL ASSOCIATION OF LETTER CARRIERS, AFL-CIO

The parties recognize the need to change existing equipment and methods so that the USPS may remain competitive and efficient. The purpose of the change is to provide the USPS and the letter carriers with a more efficient method of performing their duties and recouping the benefits of this change.

The NALC and USPS agree to jointly implement vertical flat casing (VFC). The following conditions are jointly agreed to.

The EI Process (where it exists) will be utilized to implement vertical flats cases. The expectation is that EI groups will participate in the determination of the predominant case configuration (6, 5 or 4 shelf) for each unit. Exceptions to the predominant case configuration within each unit will be made on a route-by-route basis. Carriers will have input into the size and number of separations within the case(s) on their routes.

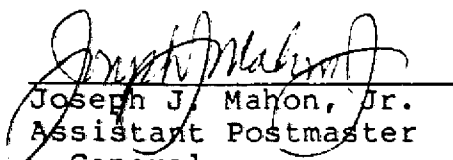

Where the EI process does not exist, joint labor/management efforts will be established to implement VFC. Whether or not the EI process is utilized to implement VFC, carrier input concerning the case configuration will be solicited.

This casing change is a permanent method for casing carrier flats. Any subsequent change to cases will be by agreement of the parties or management will follow the existing contractual guidelines.

The parties agree to complete this VFC review within 2 years. Also, they will jointly develop implementation guidelines and a criteria to be used when equipment decisions need to be made.

The city delivery, route examination and adjustment (as outlined in the M-39 Handbook, Chapter 2) processes will remain unchanged as a result of the VFC implementation. However, the parties acknowledge that this equipment change necessitates language changes in our handbook and manuals as they relate to flat casing equipment and methods, in order to recoup the benefits of this change.

The work design committee will address other changes to the applicable handbooks and manuals, as appropriate.
